Attn: Jill Rolfe

Dear Ms. Rolfe

This letter is concerning the proposed new route for the Pacific Connector pipeline.

I have written before but after attending the meeting September 20th I feel I should re-emphasize my position on the matter.

As I stated before it encroaches on unmitigated tidelands and if Mr. Messerle is correct in the amount of streams to be crossed (and I am sure he is) there is no question about it disturbing salmon spawning grounds. I also mentioned the coastal zone management act and clear water act.

This may be irrelavenmt to the issue at hand but, to quote Mr. Messerle again, he briefly mentioned trespass by Pacific Connector. This has happened twice to me My property is plainly posted No Trespassing but they entered anyway and then lied and said they were from fish & wildlife. The second time they were planting flags and were told to take their flags and leave. They argued and said they had a signed easement and had every right to be there. They even gave a fake name to who supposedly signed this document. This proves to me that these people are not trustworthy in any way.

I also reiterate the fact that this route will destroy a lot of timber, damage or destroy my watershed and take away needed pasture. Then if drainage is detered or stopped what will happen to the pipeline in the winter when we have a freshet?

Most of these problems cam be avoided by simply using the alternate Blue Ridge route and a lot
of people will not have their land invaded.

Respectfully yours

Jean Stalcup,
