

Coos-Curry Household Hazardous Waste Program

Household Hazardous Waste Collection Events

How to bring your household hazardous waste products to the event:

Products should be left in their original container. Label materials not in their original container only if you are sure of their content.

Do not mix products together, dangerous reactions can occur when some materials are mixed.

Make sure containers are properly sealed so they won't leak or spill. If a container is leaking, secure it in a secondary leak proof container.

Transport in a sturdy box or tub in your trunk or truck bed.

Please do not put items in plastic bags or garbage cans.
