FREE HOUSEHOLD HAZARDOUS WASTE COLLECTION EVENT SET FOR APRIL 29, 2017

If you missed the first HHW Collection Event, now is the time to make an appointment for the next FREE event at Beaver Hill.

Coos and Curry County residents can dispose of various household chemicals at a FREE “Household Hazardous Waste Collection Event” scheduled for April 29, 2017 (9:00 A.M. – 1:00 P.M.) at the Beaver Hill Transfer Site – (1/4 mile south of milepost 253) on Highway 101 between Coos Bay and Bandon. Please call 541-396-7624 to make an appointment to drop off your household hazardous waste. Best time to call is Monday – Friday 9am – 2 pm. We are asking you to make an appointment so we do not have long traffic lines and we are able to avoid congestion on Highway 101. Please make your appointment as soon as possible. Appointments must be made prior to the day of the event.

The collection event allows Coos and Curry County residents to safely dispose of a wide range of materials such as poisons, pesticides, solvents, fluorescent lights, pool chemicals, aerosol cans, caustic cleaners, mercury thermometers and flammable liquids. **This event is for household hazardous waste only.**

No industrial or commercial wastes will be accepted. The following **will not be accepted:** Ammunition, asbestos, explosives, fireworks, radioactive materials, medical wastes & sharps. No large quantities of unknowns will be accepted.

Please bring your household hazardous materials in the original containers with labels intact – do not mix products. Label materials not in their original containers. If unaware of specific product name, provide product category, such as pesticide or cleaning product, if possible.

Leaking containers should be placed inside a larger, plastic container with a tight-fitting lid. A non-flammable absorbent, such as kitty litter, should be placed around the bottom of the product to absorb any leaks. Label the container with the contents and date. All materials should be packed in a plastic-lined, sturdy cardboard box, secured to prevent spills and breakage. As an additional safety precaution, the materials should be placed in car trunks or in the back of trucks en route to the event.

Materials collected at this event will be sorted for reuse or recycling (for example, reusable products may be donated to community organizations), or shipped to a regulated hazardous waste treatment, storage or proper disposal facility.
