

# Coos County Noxious Weed Control District Advisory Board

## 2018 Cost-Share Program

The Coos County Noxious Weed Control District Advisory Board (Advisory Board) provides assistance to help control noxious weeds in Coos County. One of the programs setup to accomplish this mission is the cost-share program. Funding is available to help reduce the cost for herbicide, surfactant and dye by 50%; however, the landowner is responsible for associated cost for the application or an applicator. Other services from the Coos County Weed Control District Advisory Board such as training, weed identification, sources for control recommendations, management plans and rapid response to new infestations of priority noxious weeds may be available.

This year the cost-share program will focus on assisting landowners with herbicides to treat noxious weeds that have been identified by Coos County as "targeted for control" ("T" List on the County's official Noxious Weed List). In the past, the program was only available to landowners with 5 or more acres of land. We are now offering the program to landowners with smaller acreages, in particular those that are infested with gorse, as controlling gorse is a high priority for the County. For more information on controlling gorse, please refer to the <http://gorseactiongroup.org/index.php/land-manager-resources/> website. Herbicide requests to treat other noxious weeds may be considered.

The table below provides the "T" list (common and scientific names) and the herbicide offered (scientific name and examples of common name brands) to chemically control these weeds. More detailed information on management of common weeds is available in such publications as the PNW [Weed Management Handbook](#) or the USDA Herbicide Handbook (updated annually) and will not be comprehensively covered in this document. Publications such as these give detailed information on nomenclature, chemical and physical properties of many herbicides, use recommendations and precautions, physiological and biochemical behavior, behavior in or on soils, and toxicological properties for several hundred chemicals.

The herbicides listed are based on availability, cost and external recommendations and in no way is a promotion of a certain type of herbicide. The Advisory Board has selected the type of herbicides to be offered based on recommended treatments for the "T" list weeds. Remember to follow all use and safety instructions on the label when applying herbicides. The label is the law. There are other ways to control weeds and for more information on other methods please visit one of the following websites: [Oregon Department of Agriculture's Noxious Weed Profile](#) or [PNW](#).

The herbicides offered will be sold in 2.5 gallon concentrated form, with the exception of Milestone (quart) and Vastlan (one gallon), depending on the herbicide, and may not be suitable for some small acreage landowners. Therefore, property owners with more than five (5) acres will receive first priority unless the property contains Gorse then a property owner must have control of at least one (1) acre. Smaller landowners can still benefit from the training being offered; as well obtaining guidance on purchasing smaller amounts of herbicide by completing the application form.

Common Name	Scientific Name	Herbicides Offered <a href="#">PNW</a>
Blackberry, Himalayan	<i>Rubus armeniacus</i> ( <i>R. discolor</i> , <i>R. procerus</i> , <i>R. fruticosus</i> )	Triclopyr (Vastlan or Garlon 3A)
Buttercup, Creeping	<i>Ranunculus repens</i>	2-methyl-4-chlorophenoxyacetic acid (MCPA)
Gorse	<i>Ulex europaeus</i>	Triclopyr (Vastlan)

Ivy, Atlantic Ivy, English	<i>Hedera hibernica</i> <i>Hedera helix</i>	Triclopyr/glyphosate (Vastlan, Garlon 3A or Rodeo)
Knotweed, Bohemian Knotweed, Giant Knotweed, Himalayan Knotweed, Japanese	<i>Polygonum bohemicum</i> <i>Polygonum sachalinensis</i> <i>Polygonum polystachyum</i> <i>Polygonum cuspidatum</i>	Aquatic Glyphosate/Aquatic Imazapyr (Rodeo or Habitat)
Old Man's Beard	<i>Clematis vitalba</i>	Aquatic Glyphosate/Aquatic Imazapyr (Rodeo or Habitat)
Thistle, Milk	<i>Silybum marianum</i>	Aminopyralid (Milestone)
Yellow Flag Iris	<i>Iris psuedacorus</i>	Aquatic Imazapyr (Habitat)

Acreege Calculation using the common sizes available (approximate)

Triclopyr -Vastlan	1 gallon – 1.5 quarts per acre will treat 2.67 acres
Triclopyr- Garlon 3A	2.5 gallons – 2 quarts per acre will treat 5acres
2-methyl-4-chlorophenoxyacetic acid - MCPA	2.5 gallons – 1 pint per acre will treat 20acres
Aquatic Glyphosate - Rodeo	2.5 gallons - 2 quarts per acre treats 5 acres
Aminopyralid -Milestone	1 quart - 7 ounces per acre will treat 4.57 acres
Aquatic Imazapyr - Habitat	2.5 gallons – 2 quarts per acre treats 5 acres

Instructions for participation in the Cost-Share Program:

1. Landowner completes this application and returns it to the Advisory Board no later than 5:00 p.m. on May 31, 2018. (see next page for address)
2. The Advisory Board will review applications by June 8, 2018. Approval of the application is required prior to herbicide purchase or treatment(s). Applicants will be notified of results by June 15, 2018.
3. Training is required prior to individual landowner approval of herbicide cost-share. Training is scheduled for June 19, 2018 or June 27, 2018 at 6:00 p.m. at the Owen Building (201 N. Adams, Coquille OR 97423). If you cannot attend training you may not be eligible for the cost share program or we may be able to substitute training. If you have a current applicator's license that is an acceptable substitution (please include your license number)
4. Approved applicants will be notified of the cost of the requested herbicide, surfactant, and dye as well as the location and date when herbicides can be picked-up. Payment may be required at the training or at the time of pickup. Payment terms and location will be discussed at your training.
5. Landowner(s) is responsible for the proper application of herbicide. All applicators must carefully read and follow the directions on the herbicide label. Safe application is dependent on correct spraying practices.
6. Funds available for the 2018 cost-share program are limited. The application evaluation process will include the size of infestation and/or property size; however, if your application is not approved, you may qualify for other programs and trainings. Unsuccessful applicants may request to be added to a waiting list and will be contacted when more funding becomes available.
7. If you have any questions please contact OSU Extension at 541-572-5263 or email at [Coos.Extension@oregonstate.edu](mailto:Coos.Extension@oregonstate.edu) . If you need a map generated please contact the Coos County Planning Department at 541-396-7770 or by email at [planning@co.coos.or.us](mailto:planning@co.coos.or.us) .

Have you participated in the Coos County Cost share Program?

- Yes, I treated for \_\_\_\_\_ Was the treatment successful?  Yes  No  
 No

Please indicate which training you will be attending if selected to participate in the Cost-Share Program:

- June 19, 2018 at 6 pm at the Owen Building, 201 N. Adams Street, Coquille OR 97423  
 June 27, 2018 at 6 pm at the Owen Building, 201 N. Adams Street, Coquille OR 97423

**RELEASE and INDEMNITY:**

The undersigned (applicant) acknowledges that they have a legal responsibility as the owner or occupier of land to control noxious weeds and that control measures sometimes involve risks to desirable plants, animals, and humans. The undersigned hereby releases, holds harmless and indemnifies and defends Coos County, its agents, volunteers and employees, from all loss, claims, costs and expenses, damages, lawsuits or judgments, including but not limited to costs of suit and reasonable attorney fees, resulting from damage or destruction of property, personal injury or death of any person or persons which arise from applicants conducting noxious weed control activity in the area described in this Cost-Share Program Application or otherwise arising in any manner from applicant's use of the herbicides obtained through this program.
