*In order to establish the price for individual waste streams for which the Board has established a fee of an "up to" amount, the criteria the Board will consider shall include but not necessarily be limited to:

- Available capacity of the County's existing waste disposal system. Consideration will be given based upon the current availability or capacity of the system to accept additional volumes of waste. As system capacity is approached, additional waste streams will be considered less favorably. Conversely, when the system is operating substantially under capacity, new waste streams will be considered more favorably.
- Certainty of the waste stream. Consideration will be given based upon the certainty of the annual waste stream volume or weight and the certainty of delivery schedules. Waste streams which provide reasonable certainty and thus enable the County to rely upon and plan for the effects of accepting the waste stream will be viewed more favorably than those which provide no such certainty.
- The cost of providing the service and such other factors as the Board may deem relevant.
