

## [County Flood and Natural Hazards Web Tool](#)

- The [Coos County Planning Department](#) is the best source of information regarding Flood Insurance Rate Maps. The Rate Maps can be found at: <https://msc.fema.gov/portal> .
- Other maps with information about additional Oregon Coastal hazards such as Tsunamis and 100-year floods can be found at: <http://www.coastalatlantlas.net/estuarymaps/>

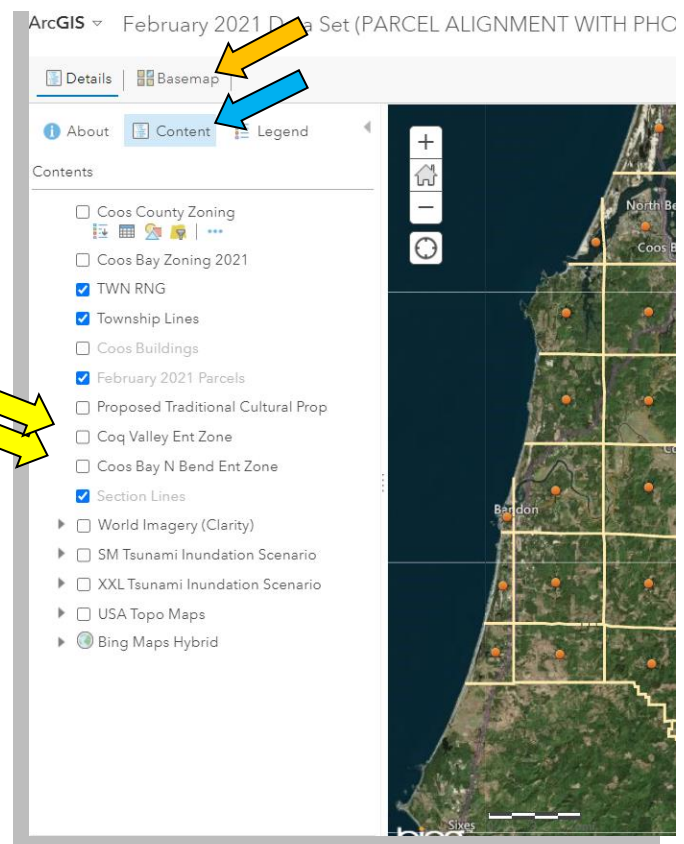

The Assessor's [GIS parcel mapping tool](#) has the 100-year and 500-year flood information as separate selectable layers.

Other Basemaps are also available in addition to the Hybrid Imagery shown:

- Topographic,
- Streets,
- Open Street Map,
- National Geographic
- More

Select the Content dropdown in the legend at the left side of the page.

Check the box of any item you'd like to display (or uncheck for anything you want to NOT be displayed).

The projected Tsunami inundation areas expected for

- ➔ Minimal damage SM Tsunami Inundation Scenario, (distant Alaska or Far East earthquake)
- ➔ Maximum damage (Cascadia earthquake) XXL Tsunami Inundation Scenario.
