This Letter is in support of the South Coast Trail Riders proposal to build a house near the end of Crannog Road.

Since the time they bought the property they have maintained their private access and allowed us to continue using it. This is one of our main access points for entering the sand for rescues. Any accidents on the beach and most on the north end of the sand are accessed thru their property.

Near the end of crannog there is a wide area that we use for staging Bay Cities Ambulance so we can transfer patients to them. This site has been maintained and kept clear of trash debris also they have expanded it out to make it easier for us. South Coast Trail Riders installed bearriers along the road and sand access point.

To sum it up South Coast Tail Riders has been a aset to not only us but people who live toward the end of cannog, people that have vacation houses, and the people who own property with trailers and tents.
