Subject: File# REM-19-01 Jordan Cove project public comment

Thank you for the opportunity to comment on the proposed project.

I am absolutely against the Jordan Cove LNG project.

Without going into a lot of detail, I feel the project costs are exorbitant in all regards, most assuredly including Social, Environmental, and Political Damage. I should add that these costs would not be limited to the Coos Bay area. Rather, they are likely to impact the entire state.

I served 30 years in the US Navy and am well aware of the difficulty in protecting transiting shipping. I am also aware of the damage that would ensue should, God forbid, an accident or terrorist incident take place.

It would be good to use a "Risk Analysis" methodology to take a close look at this project.

Thank you for your consideration.

John M. Kirby
CAPT. USN, RET.
