Re: Order from hearings officer REM-19-001

Dear Mr. ANDREW H. STAMP,

Let's be fair it is not in the best interest of all parties to reopen the record on the limited issue of the scope and effect of U.S. Coast Guard. People have been fighting this project for over fourteen years. Any more delay of the denial is abuse. The project was rejected over and over and only returns because of the thousands of dollars that JCEP has doled out to our slime ball politicians who take influence monies for this terrible project.

My recreation (fishing, clamming, crabbing, kayaking) are not for sale or trade by the State of Oregon or Coos County.

I clearly proved with my model of the LNG ship transit in Coos Bay is in reality an exclusion zone that violates my Public Trust Rights.

Please deny this application with prejudice this has gone on long enough. This project needs to go away.

Sincerely,

Power Hooker Tackle Company L.L.C.
