Subject: Permit Extension for Pembina

This Message originated outside your organization.

Dear Coos County City Council,

I am asking you, as a member of this community that cares very deeply about Coos Bay, to deny Pembina the permit extension they are requesting. I ask that you please do the right thing and let Pembina know that they cannot get the extension especially since they don't even have the necessary permits from the state of Oregon. This project is wrong for Coos Bay. To have to change the bay so much is frightening (and wrong) and I fear the noise, light and air pollution as well as the water pollution that would result. I also ask that you not be swayed by empty promises from this company. It won't bring anything more than a handful of imported jobs and a boom then bust construction that would be bad in the long term for our community. Please do the right thing and close the door on this project. Sincerely, Suzanne Brimhall
