Subject: Pembina request for pipeline permit extension

This Message originated outside your organization.

This permit should be denied. How much more should landowners endure concerning this project? Their property rights have been held hostage to a Canadian corporation long enough. Pembina and (previously) Veresen have been unable to secure state permits for JCEP. I would argue they barely tried. All along the way, they have failed to produce the information and scientific background various agencies requested.

The truth is Pembina failed to get the money to fund this project. They needed partners and never got them. They needed state permits and never got them. They needed firm long-term contracts with gas purchasers and never got them. They promised our Southern Oregon communities jobs and **we** never got them.

Their advertising and public statements often included dates and timetables. All of those have come and gone long ago. The expiration date of this permit should not be extended. The landowners deserve better. It's time for this permit to go.

Thank you for your time and attention and your service to our county.
